

ORACLE®

Sales and Use Tax Solutions for Oracle Users

Wednesday, October 22, 2008

3:00 - 4:00pm EST

If you use Oracle as the backbone of your company's business operations, and you're looking for the best possible solution to automate your sales and use taxes, this is the webinar for you. We've assembled a panel of experts to talk about ADP's Taxware solutions for calculating and remitting sales, use and VAT taxes. Specifically, we'll look at the tight integration between Taxware Enterprise (ADP's multinational sales tax engine) and the Sales and Use Tax System (ADP's USA and Canada tax engine) and:

- ▲ Oracle E-Business Suite 11i and R12
- ▲ Oracle Communication Billing & Revenue Management
- ▲ PeopleSoft Enterprise
- ▲ JD Edwards EnterpriseOne
- ▲ Siebel

The business benefits of applying this kind of technology include:

- ▲ Reduced sales and use tax liability
- ▲ Minimized audit risk
- ▲ Avoidance of costly tax penalties
- ▲ Consolidation of multiple tax systems
- ▲ Application of certified tax content

You'll hear not only from subject matter experts from ADP, but also from Office Depot, a company which uses both Oracle's ERP and ADP's sales tax solutions. Office Depot has a variety of tax needs for Purchasing, Payables, Order Management, Receivables, International, POS, and E-Commerce. Hear how they are partnering with ADP to solve these challenges. During the final 10 minutes of this broadcast, we'll take questions from the audience.
