

Outsourced Sales Tax Compliance

Wednesday
February 13, 2008
12-1pm EST

When it comes to managing sales and use taxes, most companies rely upon some type of tax engine that can be bolted onto their ERP system. During this webinar, we will explore another possibility: automating a company's ENTIRE sales and use tax process, including:

- Tax calculation
- Forms completion
- Secure transfer of funds to state and local revenue departments

This webinar will take a closer look at ADP's latest offering, **the ADP Outsourced Sales Tax Service**, and how it gives companies new and exciting options that they didn't have before. Various components of the ADP Outsourced Sales Tax Service will be discussed, with particular emphasis on the business benefits of full automation. During the final 10 minutes of this webinar, a live question-and-answer segment will take center stage, so that attendees go away with a complete understanding of available technology and the benefits that result from its application.

About the Presenters

Annette Kovamees

Tim Walsh

Matthew Walsh
