

# ADP Retirement Plan Integration

More benefits without additional burdens

**RETIREMENT PLANS ARE GOOD FOR EVERYONE.** And the SECURE 2.0 Act of 2022 will make them more widely available, flexible and inclusive — so it's easier for employers to offer a plan and for workers to build retirement security. But the Act contains 90 provisions ranging in complexity with a multi-year implementation that may significantly impact payroll and retirement plan administration — turning benefit into burden.

Some of SECURE's provisions are mandatory and will significantly effect payroll and retirement plan provisions:

## SECURE 2.0 CHALLENGES

- 90 provisions
- Multi-year rollout
- Complex calculations
- Multiple payroll and recordkeeping implications

| December 29, 2022  | 2023   | 2024   | 2025   | 2026   |
|--|--|--|--|--|

\*Optional provisions

## Your clients can upgrade their benefits without additional burdens

To take advantage of all SECURE 2.0 has to offer — and comply with the requirements and deadlines — your clients need a recordkeeper and payroll provider that can proactively manage complexity and execute flawlessly.

Managing separate payroll and 401(k) vendors can add time-consuming manual processes and result in errors that cost time, money and resources. But when your client's payroll and retirement plan are with ADP, even complex SECURE 2.0 implementation and oversight is easy and worry-free.

As SECURE 2.0 provisions drive plan amendments and impact payroll deductions and coding, ADP has your clients' plans covered. We continually conduct ongoing comprehensive analysis across our product platforms to keep the plan compliant and payroll running smoothly. From payroll process updates to automatically providing necessary plan amendments, our teams and integrated solutions save time and reduce compliance risk.

## ADP integration is built to handle complexity

When choosing a retirement plan provider, what's more important than plan integration? Maybe nothing — integration is critical to simplifying plan administration and oversight, keeping data secure and delivering best-in-class employee engagement.

The ADP SMARTSync® solution connects ADP Retirement Services recordkeeping technology with ADP payroll. SMARTSync's proprietary, advanced technology enables real-time data transmission, verifies data against the retirement plan document and automatically performs calculations. Because data is shared continuously between ADP's platforms, critical plan information and employee records are updated systematically and without manual intervention. SMARTSync offers major advantages:

- Verification of payroll data against the plan document — reducing manual oversight and mitigating risk
- 360° integration that protects data, outperforms third-party payroll integrators, and avoids external file feeds
- All your clients' data is housed in ADP's ecosystem, significantly decreasing the chances that security will be compromised.

## Not all integration is the same

Unlike providers who use bi-directional feeds or third-party payroll integrators, SMARTSync automates manual processes, updates and verifies data in-real time, saves time and can mitigate risk. Payroll integrators do not use 360° integration — they simply transfer data from one provider to another. Other major disadvantages of this type of relationship include:

- Manual set up process
- No data review or verification
- Multiple vendors to manage
- Potential additional fees
- Security risks

By combining payroll and retirement with ADP, you and your clients can be confident that the important details are securely handled.

THANKS TO INTEGRATION between ADP's payroll and retirement plan solutions, your clients won't have to:

- Identify impacted employees
- Check and add deduction codes
- Handle plan amendments
- Tackle special calculations for employee contributions and employer match
- Confirm data bridges are in place
- Review custom payroll reports

## Let's talk.
