

RETIREMENT SERVICES

ADP ACHIEVE

PERSONALIZED RETIREMENT JOURNEY

Powering informed participant decisions with data-inspired benchmarking

Always Designing
for People®

FOR FINANCIAL PROFESSIONAL USE ONLY — NOT FOR DISTRIBUTION TO THE PUBLIC.

Planning for retirement involves difficult financial decisions, leaving workers unsure about where to start and what to do next.

WORKERS ARE COMMITTED TO SAVING FOR THE FUTURE — 62 percent say retirement saving is their top financial priority¹ — but they need assistance with retirement planning to help them reach their goals. Most employees are not very confident they are doing a good job financially preparing for a secure future and find retirement planning to be a source of stress.

The ADP Achieve personalized employee education program engages workers with technology and data to solve challenges, simplify retirement planning, and help participants make choices that may lead to more successful retirement outcomes. Achieve leverages the ADP DataCloud to create meaningful, personalized insights that can help participants more confidently make tough financial decisions. Drawing upon aggregated and timely data from nearly 30 million U.S. workers in more than 90,000 organizations, we group this data into clusters and use data analytics, plus machine learning, to derive personalized insights. This allows us to create peer profile-based benchmarks and provide relevant insights to help make it even easier for workers to confidently make informed decisions and plan for what's next.

Peer information can influence decisions

We make complex retirement planning decisions easier with a personalized messaging program that helps participants when they need it most — as they're making critical choices about saving for retirement. The messaging answers a common question: what do other people like me do when it comes to saving for retirement? Instead of getting overwhelmed and stuck, we prompt them with data-inspired answers they can use to guide their own retirement plan decisions. Here's how it works:

- At critical decision points along the retirement planning journey, we provide participants with relevant data insights that are reflective of decisions made by savers under similar circumstances.
- These insights are derived by leveraging data-driven intelligence based on the savings actions of millions of similar retirement plan participants and advanced machine learning models.
- Eligible participants can compare their decisions to their peers' and take action in the moment.
- These insights are integrated into our mobile applications and digital enrollment experience, participant website, and the MyADP Retirement Snapshot® tool to reassure participants about their decisions and encourage them to act.

The personalized messaging leverages plan and individual data. Plan features, individual behaviors and personal characteristics are used to inform and guide participants throughout their retirement journey.

PEER BENCHMARKS ARE CALCULATED USING DEMOGRAPHIC AND EMPLOYMENT INFORMATION INCLUDING:

Age

Gender

Employment
tenure

Compensation

Marital status

Hourly or
salaried status

How it works

We support workers throughout their journey to retirement with guided experiences that help them make smart decisions right from the start. This includes messaging that encourages them to join the plan as soon as they can, maximize employer contributions, understand savings decisions of their peers, and learn how much they need to save for a secure future.

Enroll Today

Saving for your retirement has never been easier. Whether you're just getting started or you have already been saving, we're here to help you on your journey to retirement readiness.

Your company offers a 401(k) match. Take advantage of it by getting started now.

Guided enrollment experience

For those employees who need a little more assistance when enrolling, we've created a guided experience to help support them. Our personalized enrollment journey includes relevant messaging tailored to meet the participants personalized needs and encourage them to begin saving. This is where we utilize our data-driven peer benchmarking to help to guide eligible employees with selecting an adequate savings rate. By leveraging this data, we're able to provide employees with real and relevant insights into how much people like them are contributing to their 401(k) plans and whether they are contributing enough to reach their goals.

The screenshot shows a multi-step enrollment process. The current step is 'SET SAVINGS AMOUNT', with other steps being 'SELECT TYPE', 'SELECT INVESTMENTS', and 'REVIEW'. The main heading is 'Set your saving amount' with the instruction 'Choose the amount that you want to contribute to your retirement saving per paycheck.' A yellow callout box contains a message about catch-up contributions: 'You're eligible to make catch-up contributions! You may be able to save an extra \$6,500 this year. Catch-up contributions start after you reach the 2020 annual contribution limit. Your retirement contributions above the regular annual limit are considered catch-up contributions up to a maximum of \$6,500 this year.' Below this is a 'CHOOSE CONTRIBUTION TYPE' section with a percentage dropdown set to '%'. The 'Before-Tax' option is selected, showing a current contribution of '9' resulting in '\$117 /paycheck'. A 'Save Smart' feature is enabled, with a checkbox 'Includes a SaveSmart increase of 1% every November until 10% is reached.' The 'Save Smart' configuration includes: 'Increase by' (1%), 'Maximum %' (10%), 'SaveSmart Month' (November), and 'SaveSmart Year' (2021). A note states 'Save Smart will only be applied to Before-Tax 401(k)'. A 'View Contribution Election Limits' button is at the bottom. On the right, there is a piggy bank icon, a 'Not sure how much?' section with a link to 'See what's possible', and an 'FAQ' section with questions like 'How much can I contribute?' and 'What is Save Smart?'. Navigation buttons for 'PREVIOUS' and 'NEXT' are at the bottom.

By leveraging this data, we're able to

provide employees with real
and relevant insights

into how much people like them are contributing to their 401(k) plans.

As participants move through the enrollment process, messages at critical decision points can help drive positive savings choices. The messaging provides insights about peer decisions generated from workers with similar demographic and employment data including age, gender, marital status, compensation, and employment tenure and status.

Plus, our MyADP Retirement Snapshot® tool leverages data-driven intelligence to help guide employees with their enrollment decisions. Messaging about:

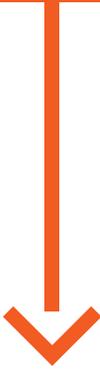

- General retirement savings targets and statistics about peer savings rates offer participants comparative benchmarks they can use to determine their own savings rate.
- Plan matching contributions (if available), encourages participants to maximize their match benefit by meeting the requirements.

Continued support through the retirement journey

Enrollment support is just the start. Because participants need help and assistance throughout the retirement journey, peer messages will be enabled to guide them and make informed decisions. For example, encouraging participants to increase savings, take full advantage of the match and use plan features that automate plan savings management can help participants improve their future retirement outlook.

The screenshot shows a user interface for the MyADP Retirement Snapshot tool. At the top left, there is a 'FAQ' link. A central illustration of a person is surrounded by two callout boxes: one on the left stating 'Among people similar to you, Top Savers are contributing 17% or more.' with a 'How do you know?' link, and one on the right stating 'Nice! This contribution maximizes your company's match.' Below the person is a 'CHANGE MY DETAILS' button. The main content area displays 'By saving \$638 per paycheck your savings by 67 may be about \$650,033'. Below this is a slider control for the contribution rate, currently set at 9%, with minus and plus buttons and a 'contribution per paycheck' label. Underneath, it says 'Your MyADP Retirement Snapshot looks like:' followed by three summary cards: '\$129,936 savings from employer match', '\$4,814 monthly income for selected lifestyle', and '86 age your savings may run out'. At the bottom, there is a 'Methodology & Disclosures' link and a large 'I want to start saving' button.
