

# Don't leave payroll accuracy to chance!

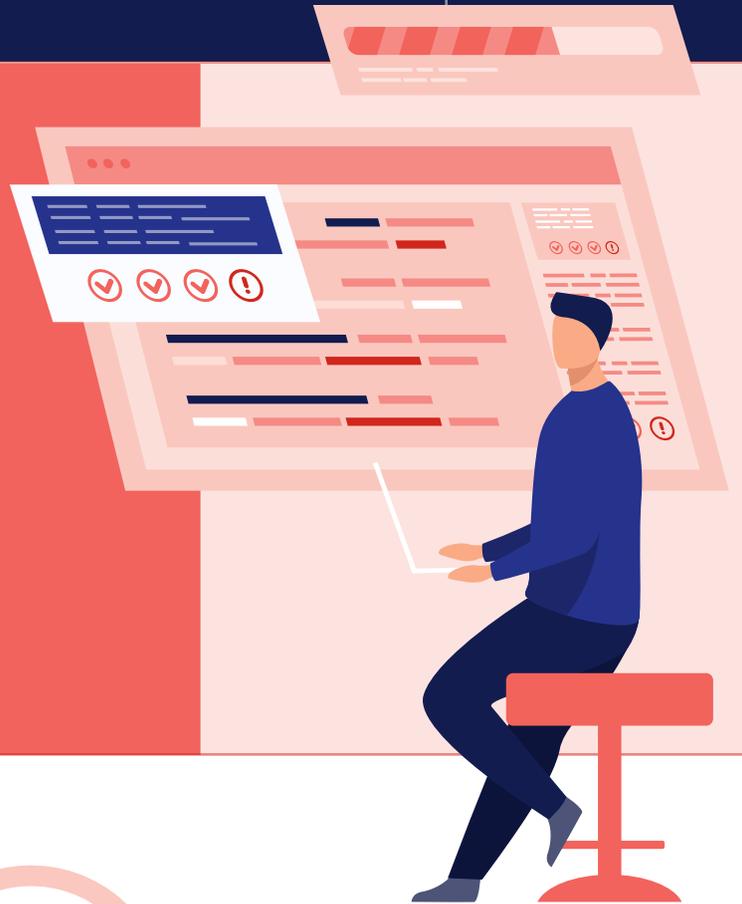

Paying workers precisely what they're owed matters more than ever, and ADP® time and attendance solutions can help.

Reduce errors by streamlining the flow of information from punch to paycheck, when you bring your manual timekeeping process online, as part of your ADP payroll solution.

It's simplicity at its finest, backed by industry-leading technology.

- It starts with employees clocking in and out, recording breaks and transfers as they occur.
- Then rules and policies such as overtime and holiday pay are applied, so hours are properly calculated.
- Exceptions can be highlighted and quickly addressed, and hours flow easily to payroll.

Say goodbye to paper timecards and manual data entry and say hello to fewer errors and happier employees!

According to a recent ADP Research Institute® survey of over 32,000 employees in 17 different countries:

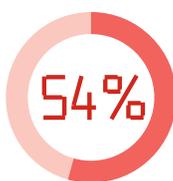

**Nearly half (45%) of workers** are paying closer attention to their pay than they did before the pandemic.

63%

More than **three in five (63%)** say they have been underpaid at some point, with **one in five (20%)** saying it always or often happens.

**More than half (54%)** believe they have been overpaid at some point.

52%

**More than half (52%)** say they have experienced some other form of incorrect payment, such as a failed payment or an incorrect tax code.

0\*

**Essential workers are disproportionately affected:**

**7 in 10 (71%)** report they experienced underpayment compared to **just over half (53%)** of non-essential workers.

0

**Contract workers are affected too:**

**58%** Well over half (58%) say they have experienced payment errors versus those with employed jobs (**50%**).
