

Adding RUN helps dedicate more time to fitness and fun

At the core of its mission, JumpBunch looks to introduce sports and fitness activities to young children in a fun and engaging way. Whether it's planned activities, equipment used or musical selections, every aspect has been thoroughly researched and developed to be fun and beneficial, helping to develop the young minds and bodies of children nationwide ranging from pre-school to sixth grade. With business growth a priority, the need for a payroll solution was apparent to help realize this objective. Anne Marie McCabe, owner and CEO, shares her thoughts and experiences with ADP®.

Finding a win with an outsourcing solution

As a new franchise business owner, I was a bit unsure about what the needs of my business were — and would be — in terms of an HR and payroll perspective. But I knew I wanted a service that would help eliminate many of the concerns that inherently take place when running a business. When I met with our ADP sales rep, Garrett, I explained this to him. Not only was he an excellent listener but he was very responsive to my concerns, quickly introducing me to RUN Powered by ADP® ("RUN"). He understood the types of services I would require as I look to grow my business for years to come. I was hoping for a win right out of the gate and with RUN, I feel like I got that win.

I feel that using RUN has been a critical component to the success of my business. Along with being exceedingly intuitive and user-friendly, RUN has saved me so much time — not only when I process payroll, but also when I am onboarding new hires and more. From launch through today, I have been able to effectively manage my HR and payroll needs and I'm confident that ADP's full range of services will be available to support our ever-changing needs as we continue to grow.

Always Designing
for People™

RUN is helping her achieve what she's working for

Childhood obesity has an immediate effect on child well-being and it increases the long-term impact on physical, social and emotional health. And, a child with obesity is more likely to suffer from obesity as an adult. I'm working to help change that, to create awareness and make a difference by being at the forefront in the fight against childhood obesity by helping to instill a love of health and well-being that will carry over to future generations. Using RUN has helped me efficiently and effectively manage my payroll needs from the start, allowing me to shift away from the more administrative tasks of running a business and put more focus on accomplishing my goals of making an impactful difference in children's lives.
