

Build a better benefits system with ADP Workforce Now®

Your HR team's time is valuable, and so is your employees'. Help them both be more efficient with ADP Workforce Now's benefits tools, which helps to reduce time, paper and manual processes. Hear from real clients about their experience using ADP's benefit solutions:

I love the benefits and doing our open enrollment electronically through ADP and not having to do everything by paper anymore. Employee self-service saves us so much time now that our associates are able to get the information they need and make the changes they want all by themselves. Many modules ADP offers have saved us so much time and money, which is especially important during turnover and without replacing every associate in departments like HR and payroll. We can now do more with less people.

Karen DeRose, payroll manager, RedBuilt LLC

ADP is very good at what they do. Using self-service for benefits administration has reduced the amount of paper, emails and mail. It has increased accuracy and efficiency because the system can prevent an employee from filling out a form incorrectly and because the data doesn't have to be re-keyed a number of times. It's easier for employees, because all the information is in one place and can be completed online. It saves me a ton of time, increases accuracy and efficiency and my employees love the ease of use.

Venissa Nieves, payroll administrator, New Visions for Public Schools

ADP benefits enrollment and administration helps solve my HCM challenges by storing all the benefits information for each of our employees. It is a one-stop place to see who has what benefit and the deductions flow directly into payroll, making life much easier. I would recommend ADP Workforce Now benefits enrollment and administration to a peer because it is a great place to store all your benefits info. It connects to payroll and HR, making all of your processes work seamlessly together.

Carolyn Magee, payroll specialist, Streamlight, Inc.

We chose ADP based on their reputation in the industry and the design of the benefits enrollment and administration module, which provides a great user interface. It also provides employees with time savings with the fact that we have no more manual processes for benefits, and it's easier for our HR team to process employee changes and manage annual enrollment due to the user interface and great support from the ADP team. I would happily recommend ADP's benefits enrollment and administration module to my peers based on the ease of use, accuracy and time savings for employees and HR. Benefits enrollment has never been easier with the addition of the ADP module.

Rachel Coffman, payroll/office manager, Claridge Products and Equipment
