

Having the backs of nearly 800,000 small businesses

across the United States, we've learned a thing or two about how to help small business owners go all-in on their dream. We take pride in the level of support we provide our small business clients, but don't just take our word for it.

Here's what other business owners are saying about our customer service and what the ADP® difference has meant to them:

The service is of a much higher quality and there's more support with ADP. When I call the 800 number, **people are able to give me answers and they are able to make suggestions that help me.** That doesn't happen with every service.

Adrienne Fudge, owner and chef, 40 Dreams Catering

Using RUN for our payroll has made it really simple. And if we ever have a question, **ADP's customer service has always been super helpful. We get an answer every single time.**

Allyson Simmons, office manager, CopperMoon

The customer service with ADP has always been really, really great and very responsive. We've been very pleased with ADP for payroll, HR and their other services.

Michael Arnett, chief operations officer, BNL Consulting

ADP attends to our payroll needs, and we love that they are accessible at all times. **Whether it's our representative or someone else, there's always someone we can contact who can assist us with any questions or issues.**

Lisa Duque, operations manager, California New Business Bureau, Inc.

The biggest advantage of working with ADP **is the peace of mind that comes with knowing there's always someone I can call with a question and get the correct answer.**

Jon Moore, owner, JDog Junk Removal and Hauling, North San Diego

Real clients. Real challenges. Real solutions.

Are you ready to discover how your business can benefit with ADP to help achieve what you are working for?
