

Always Designing
for People™

A mobile solution for a mobile workforce

Technology is changing the way people work. Now, your employees access almost everything from their phones — why should their work information be any different? That's why we designed an award-winning mobile app to help you help your people get everything they need, right at their fingertips.

Don't take our word for it — hear from our clients the ways ADP® Mobile has helped to transform their workforce:

"Very useful"

The ADP mobile app is very useful for our employees who don't sit behind a desk — our truck drivers, our warehouse people or one of our salespeople who is always on the road. In the past, they would have picked up the phone, called the payroll department and wasted time. Now they can check whatever they want, whenever they want and wherever they want. That's really terrific!

Steven Eigen, CFO, CNG

"Terrific"

We have the ADP mobile app, which our folks love and rely on, because most of them are not sitting in front of a computer during the workday. It's terrific for that situation — they're able to submit their timecard, request time off and look at pay vouchers and their benefits all via ADP Mobile.

Mary Ann Haskins, HR and support services director, City of John's Creek

4.7/5.0 user rating from Apple App Store (iOS) from over 1.1 million reviews!

"Very, very easy"

The ADP mobile app saves us all a tremendous amount of time and makes it very easy for my drivers. Every single one of them has it loaded on their personal phones, so they don't have to drive back to the station to punch in and out — they're able to use the mobile app to accomplish those tasks. When they're on the road, they can clock out, take their lunch, clock back in and continue to deliver packages. Everything is right at their fingertips, which makes it very, very easy and saves a lot of time for the drivers.

Jose Mercado, president, Thunderbolt Logistics

"A talent attraction"

Overall, ADP Mobile is a talent attraction and retention advantage. We utilize information which largely belongs to our associates every day, and ADP Mobile puts it right back in their hands.

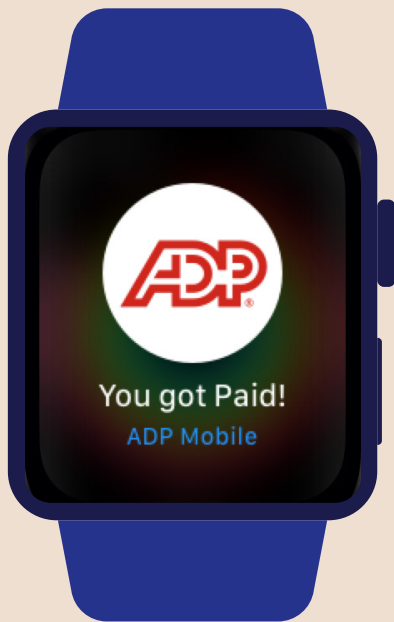

Caroline Wyatt, vice president of human resources, Yoke's Fresh Markets

"A huge win"

The ADP mobile app has been hugely successful for both management and employees. Many of our employees are in a truck eight hours a day and do not have access to a computer. With ADP Mobile, they can clock in from their phone, see their paychecks and their vacation days and access everything else within the app with just their thumbprint or facial recognition. ADP Mobile has been a huge win for us and our employees.

Nathan Graham, director of human resources, Kwik Chek

"Incredibly helpful"

About six months ago, the ADP mobile app became available to the employees for use on their personal mobile devices. Many employees are using it regularly, because it makes it easier for employees to request time off and clock-in. This has been incredibly helpful, because now people don't have to wait in line for the time clock or to clock-in at a computer. Additionally, employees can use the app to view their accrued time in the system. This ability to self-serve saves me time, since I am usually the person who has to respond to time-related inquiries.

Lois Dutton, director of human resources, St. Vincent de Paul Society-San Francisco

"A game changer"

ADP offering a mobile app for employee self-service is just plain wonderful, because a large chunk of our workforce is mobile. They're not at a desk, but out in the field using tablets and their personal smartphones. We couldn't push important information out to our employees as effectively as we're able to now. The fact that we've been able to mobilize our workforce with the ADP mobile app has truly been a game changer.

Lindsay Willis, vice president of human resources, LHP Capital

"At their fingertips"

With the ADP mobile solutions app, our employees are able to get the information that they need when they need it. A lot of employees prefer to use the app because they are able to pull it up on their phone and have their information right there. They can download their paycheck right from their phone and send it off to say, a mortgage company. They don't need to make a phone call or send an email — they have the information they need at their fingertips.

Nicole Roberts, payroll manager, The Boston Globe

"A huge timesaver"

With the ADP mobile app and self-service, managers can log in, look at their team members' requests for time off, look at their calendars, look at their PTO balances and approve or deny their time off. Everything is visible. This is a huge timesaver and a perfect fit for the technical workforce we have.

Sarah Garcia, director of human resources, DoubleDown Interactive
