Adaptable Technology Platform

Benefits of adaptable technology in HCM:

- Enables organizations to adapt to changing requirements.
- Leverages low-code development tools.
- Supports rapid deployment and deployment automation.
- Facilitates faster delivery of new capabilities.

Adaptable Technology

- Low-Code technology
- Graph Database
- Cloud-native infrastructure

Graph Database lets your HCM system reflect how work actually gets done. With visual, drag-and-drop interface, non-technical users can easily create and deploy apps.

Cloud-native architecture means significant improvements in experience, performance, scalability, and availability of your system.

Low-Code means your technology can adapt as fast as your organization does.
