From: ADP Global Security Organization
Subject: Vulnerability Alert – Remote Desktop Services vulnerability (CVE-2019-0708)

ADP is aware of the Remote Desktop Services vulnerability (CVE-2019-0708) that could allow attackers to execute code remotely on affected systems.

At this time, no intrusion has occurred. Our layered defense includes processes, technologies and controls to address a range of issues and threats, that includes assessing vulnerabilities and applying appropriate protection and detection control updates.

The Global Security Organization continues to actively monitor this situation as it does with all reported vulnerabilities. Clients are encouraged to visit our website at www.adp.com/trust to learn more about how ADP protects data, and how clients can help protect themselves.

Protecting our clients and their data from malicious activity is a top priority for ADP.
