Date: December 22, 2020
From: ADP Global Security Organization
Subject: SolarWinds Statement

Upon receiving reports of the SolarWinds Orion Platform software attack, ADP's Global Security Organization conducted a full investigation and analysis to determine any potential impacts to our systems. At this time, we can confirm that none of our systems, tools or products were compromised and no intrusion or data access has occurred. While ADP does not utilize the SolarWinds Orion Platform software to manage its enterprise network, we identified and mitigated a small number of isolated systems with potentially vulnerable software. We also reviewed our environment, monitoring systems and logs for any indications of other related impacts.

Protecting our clients and their data is a top priority for ADP. Our team is continuing to actively monitor this situation as it does with all reported vulnerabilities.
