

Date: July 6, 2021
From: ADP Global Security Organization
Subject: Kaseya VSA Ransomware Statement

ADP recently became aware of the Kaseya VSA software ransomware attack and began an investigation to determine any potential impacts to our environment, supply chain and critical vendors. At this time, we can confirm that ADP does not utilize the Kaseya software, none of our systems have been affected by this issue, and no intrusion has occurred. Additionally, using available threat indicators, we reviewed our environment, monitoring systems and logs and have not found any related impacts.

ADP's Global Security Organization continues to actively monitor this situation as it does with all reported vulnerabilities. Clients are encouraged to visit ADP's website at www.adp.com/trust to learn more about how ADP protects data, and how clients can help protect themselves.

Protecting our clients and their data is a top priority for ADP.
